

**NARRATIVE:**

The purpose of this survey is to see where a house lays in relation to two tax lots described in a deed to The Price Trust dated 11/15/93 (Reel 251, Page 1062). Also to possibly do a tax lot line adjustment. I based the bearings on a survey for O.R.C.D. which I did in 1977 South of the highway. I also used my survey done in 1978 for Bliss (also Partition Plat #1991-09), which had the same bearing base, to compute the location of the N-S centerline of the section from which most of the deeds are written.
