TYPICAL APPROACH DETAIL
1" = 5'

Note:
Limits of constructed approaches as directed

TYPICAL ROAD CROSS SECTION
n/a

GENERAL NOTES:

1. Meet and match new pavement with existing pavement.
2. Slope for ditchline shall be as shown or directed.
3. The contractor shall be responsible to contact all utilities or other pertinent agencies in order to locate and protect underground facilities prior to starting construction, per paragraph 105.4, 105.5 and 105.6 in the General Provisions.
4. At locations indicated on the drawings, the contractor shall extend the new structure for the road to meet with existing pavement of intersections with other roadways. Limits of the meeting of the pavement structures shall be complete to real lines as directed.
