	<p>From the corner to Townships 1 and 2, North of Ranges 28 and 29 East, I run a random line between said Townships setting half mile and mile posts at 40.00 and 80.00 chains. I find the line to be 6 mile and 6 chains in length and the falling to be 300 lks. South of Townships corner. The correction will, therefore, be 6 chains West and 50 lks. North per mile.</p> <p>Note: I rechainned the South boundary on the Base Line and find it to be 6 miles, 6 chains and 69 lks. in length.</p>
