General Description.		
<p>The surface is mostly nearly level; a small part is rolling. The greater part of the soil is either 1st or good 2nd rate and is excellent for wheat and other small grain.</p> <p>There are three settlers on Sec. 25 and one on 26.</p>		
<p>I raised mounds of stone at corners in lieu of pits as they are more easily found and much more durable.</p>
