

## General Description

Surface is mountainous, North two of sections rolling plateau, soil mostly 3<sup>d</sup> rate, some on plateau 2<sup>d</sup> rate and small part on Umatilla river 1<sup>st</sup> rate. The timber on the plateau and along the streams is generally heavy and valuable; on the hillsides it is irregular being either in thick small groves or open and scattering, and cannot be indicated on plat, though the surface of this township is not all covered with timber, yet the timber there is heavy, is for the reason all so much the more valuable.
