

## Subdivisional Lines of T. 4 N R 38 E., W.M.

Chains		Feet
	<p>The retrace shows the old Cors. to be very badly dilapidated, and in most cases almost entirely obliterated; and the lines to be practically destroyed, and it shows many of the courses to be out of limits. Therefore, in order to properly execute the new survey and to re-establish the old obliterated Cor., I proceed to resurvey the lines retraced in accordance with the Manual and the authority given me in my special instructions.</p>	
	<p>July 18, 1905: At 2 h. and 5 m. p.m., l.m.t., I set off 45° 48' on the latitude arc; 21° 3' N. on the decl. arc; and determine a meridian with the solar at the Cor. of Secs. 19, 24, 25 &amp; 30, which is a fir, 20 ins. diam. marked and witnessed as described by the surveyor general, thence I run</p>	
	<p>S. 88° 56' E. on a resurvey bet. Secs. 19 &amp; 30</p>	
	<p>Ascend through heavy timber and dense undergrowth.</p>	
32.00	<p>Leave heavy timber and enter scattering timber, brs. N. &amp; S. Thence over rolling land.</p>	
38.00	<p>Intersect the old <math>\frac{1}{4}</math> Sec. Cor., which is a basalt stone, 16 x 12 x 5 ins. marked as described by the surveyor general. No trace of the pits remains. I reset the stone, 11 ins. in the ground and raised a mound of stone, 2 ft. base, foot and half high N. of the Cor.</p>	
	<p>Therefore the W. half of the line is 38.26 Chs. in length and brs. S. 89° 10' E. Thence I run S. 89° 40' E.</p>	
44.00	<p>Settlers road, brs. N. and S.</p>	
44.50	<p>Wire fence brs. N. and S. enter heavy timber, brs. N. &amp; S.</p>	
78.35	<p>Intersect the old Cor. for Secs. 19, 20, 29 &amp; 30, which is a basalt stone, 15 x 10 x 10 ins. marked as described by the surveyor general. The bearing trees are overgrown and some of them dead. I re-establish a Cor. at the same point as follows: Set a basalt stone, 15 x 10 x 10 ins., 10 ins. in the ground for Cor. of Secs. 19, 20, 29 &amp; 30, marked with 5 notches on the E. and 2 notches on the S. edges, from which:</p>
